Office Action Summary

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-9, drawn to a sensor assembly having first and second pair of strains sensors, classified in class 73, subclass 862.041.

II. Claims 10 and 40-44, drawn to sensor assembly having first and second sensing elements, classified in class 73, subclass 862.041.

III. Claims 11-23, 29-39, and 45-70, drawn to sensor assembly having strain sensors disposed on a flexible pyramid-shaped body, classified in class 73, subclass 862.041.

2. The inventions are distinct, each from the other because of the following reasons: Inventions I, II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination is a two dimensional assembly that only requires first and second sensing elements. The subcombination has

separate utility such as a three dimensional strain sensor assembly having sensors disposed on a pyramid-shaped body.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Dickens whose telephone number is (703) 305-7047.
